MORIN SINGH RATHORE

FULL STACK DEVELOPER

+91 99823 92061 | morinsrathore@gmail.com

LinkedIn | GitHub

Ahmedabad, Gujarat, India

CAREER OBJECTIVE

Motivated Full Stack Developer with a B.Tech in Computer Science and Engineering and a strong foundation in Java, Data Structures and Algorithms, and database management. Eager to apply technical knowledge, analytical thinking, and problem-solving skills to develop efficient and scalable software solutions. Seeking opportunities to contribute to innovative projects, collaborate with diverse teams, and continuously grow as a technology professional.

ACADEMIC PERFORMANCE

Full Stack Development Trainee | 2026 – pursuing

TOPS Technologies

- Technical Grade: A

Bachelor of Technology – Computer Science & Engineering | 2021–2025

Poornima College of Engineering

- Average CGPA: 8.18
- Last Semester CGPA: 10.0

Higher Secondary / Class XII | 2020–2021

Nalanda Academy, Kota, Rajasthan, India (affiliated to CBSE)

- Percentage: 82.4%

Secondary / Class X | 2018–2019

HG International School, Abu Road, Rajasthan, India (affiliated to CBSE)

- Percentage: 91.8%

SKILLS

Technical Skills: Java, C, C++, HTML, CSS, JavaScript, Bootstrap, MySQL, Git/GitHub, Next JS

Soft Skills: Problem Solving, Communication, Leadership, Adaptability, Teamwork, Time Management

Languages: English, Hindi

EXPERIENCE

Systems Engineer Trainee | 16th June 2025 – 2th Dec 2025

Infosys, Mysore

- Studied Java programming, Data Structures and Algorithms (DSA), and database management using HSQL, strengthening foundational knowledge of object-oriented programming, problem-solving, SQL queries, and database operations.
- Practised programming concepts and algorithmic problem-solving while developing an understanding of database design, data retrieval, and manipulation.
- Participated in business-oriented seminars and professional development sessions covering organisational and corporate topics, including shareholders and business fundamentals.
- Participated in impromptu project ideation and presentation activities, proposing original project concepts and communicating ideas clearly to an audience.
- Demonstrated leadership and teamwork by forming and leading a team in an inter-team football competition, coordinating team participation and collaboration.

- Actively engaged in peer networking and cross-functional interactions, building professional relationships through project discussions, presentations, extracurricular activities, and collaborative learning.
- Participated in communication and language-development training and assessments as part of the corporate training programme.

INTERNSHIPS

Data Structures & Algorithms | Jan 2024 – Apr 2024

GRRAS Solutions, Jaipur

- Studied and implemented fundamental data structures, including arrays, strings, linked lists, stacks, queues, and trees, along with searching and sorting algorithms.
- Practised problem-solving using recursion, iteration, time and space complexity analysis, and basic algorithm design techniques.
- Completed programming assignments involving array manipulation, string processing, searching, sorting, and logical problem-solving.
- Developed a **Student Record Management System** using arrays and basic searching and sorting techniques to store, retrieve, and organize student records.
- Strengthened programming logic, debugging skills, and the ability to select appropriate data structures and algorithms for solving computational problems.

PROJECTS

Park Sphere

Parking Management / Smart Parking Solution

- Developed a solution addressing parking-related problems in North Indian states.
- Conceptualized a smart parking platform that enables users to discover and reserve parking spaces within a 500–600 meters radius of their desired destination.
- Integrated map-based location services to help users identify nearby parking options and simplify the parking reservation process.
- Designed a booking workflow inspired by ride-hailing platforms, allowing users to select a suitable parking location and reserve a space.
- Proposed a technology stack using HTML, CSS, JavaScript, Bootstrap, Java, MySQL, and Google Maps API to support the user interface, booking logic, data management, and map integration.

EduTrack

Student Record Management System

- Developed a web-based application to manage student records, including student names, roll numbers, courses, and academic details.
- Designed a responsive user interface using HTML, CSS, JavaScript, and Bootstrap for adding, viewing, updating, and deleting student records.
- Implemented backend functionality using Java to process user requests and manage student information.
- Used MySQL to store and retrieve student records, implementing basic CRUD (Create, Read, Update, Delete) operations.
- Applied object-oriented programming, database connectivity using JDBC, and input validation to maintain organized and consistent student data.

CERTIFICATIONS

- Enhancing Soft Skills & Personality, NPTEL — IIT Kanpur —Feb – Apr 2024
- Consumer Psychology — IIT Guwahati — Jul – Sep 2023
